New Publications. The Discarded Queen By G. W. M Reynolds. Philadel-

phia: T. B. Peterson. Mr. Reynolds, has written quite a number of works, of which the above is not the least worthy.

It is for sale by Hagan & BRO., Market street. Little Dorrit, By CHARLES DICKESS. Philadelphia: T. B.

At length the career of "Little Dorritt," the incomprehensible little daughter of the "father of the Marshalsea," is finished; and we have the second part in book form, of one of the latest and best productions of Dickens' pen. Notwithstanling the unmerciful horse-whipping Dickens gave to our country in his "Notes of Travel," whereby he obtained the cordial ill-will of many of our countrymen, he is more universally read than any English author of the day, this side the Atlantic. In his way, and indeed we have nothing to say against his way, he is incomparably the best novelist of the age. He is unlike all others, in his characters, plots and style. The day will come, doubtless, when he will, in some, at least, of his works, occupy a place among the first English classics. Whoever has read the first part of Little Dorritt, will of course read the second; and whoever has not read it ought to get it complete; which they can do, of HAGAN & BRO., Market street.

Mr. Dolbear continues to receive pupils to his writing classes daily. We are glad to learn this fact. It is a good indication that our citizens are alive to the importance of good penmanship. Let then send in still more pupils. The classes are al' ways open, and pupils can be entered at any time. The vacation could not be better spent by the children who attend the schools. TRABUE & Lucus, have what they call a "a large

and extensive distress sale," on to-morrow and next day. Those who want any article in the Dry Goods line, will look into the particulars in another column, and attend on the days named. We learn that the cotton crop of the West-

ern District holds out but slim promises of a good yield. The grain crops, of that region, and throughout the State, as far as our information extends. were never better.

turers-Third Annual Fair.

The Mechanics and Manufacturers of Tennessee and adjoining States, are reminded that the Third Annual Fair and Exhibition of the Mechanic's Institute of this State, will commence in October next in this city. The annually increasing interest manifested in these exhibitions, and visible advantages resulting to exhibitors, as well from the dissemination of important information among themselves, as from the great publicity which they are thus enabled to give their business renders it certain that the approaching exhibition will eclipse in magnificeuce and interest all its predecessors. Copies of Circulars, giving full particulars, can be

obtained at the Mechanic's Institute rooms, College street, opposite the Sewanee, or by addressing the President, WM. STOCKELL, or Secretary H. K. WAL-[June 25-3m.

Crooker's Millinery Establishment. We doubt whether the fair dames and belles of Nashville have ever experienced so much difficulty in the selection of a bonnet, as this season, at this establishment. The cause is not to be found in the increased fastidiousness or captiousness of their tastes, nor in the paucity of the stock or inelegance of the styles. No; we must look for it in some other quarter. Their fancies, to tell the truth, have been bewildered by the great variety and beauty of the assortment to choose from. They experience such sensations while beholding it, as one feels igen rich conservatory surrounded by the rarest exotics, andlaved in their delicious perfumes. They have such emotions as led the poet to wish that the condensed into one pretty pouting pair that he might, in kissing them, kiss the whole race. Where Bruhes, Pocket Books, Portmonies, Razers and Straps, there is so much elegance, so great a variety, a consors, &c. For sale by choice must be difficult. The thing's natural; and the dear creatures are not to blame. But not of bonnets alone does Crooker's congress consist. Nearly all descriptions of millinery goods are represented there-from the lightest and most etherial to the heavier fabrics which art produces to adorn the oveliest of nature's bandiworks.
